As of December 2009 active inventory was 655, an 11% decrease from December 2008. There were 63 closings in December 2009, 29% above December 2008. Months of Inventory was 10.4, down from 14.9 in December 2008. Median price of sold homes was $378,000 for the month of December 2009, up 11% from December 2008. The North area is experiencing a significant increase in buyer activity, with new properties under contract up 82% from December 2008. If you are looking to buy a home, you now have until April 30, 2010 to qualify for the Home Buyer Tax Credit! Up to $8,000 for first time homebuyers and now up to $6,500 for current homeowners purchasing a primary residence. Contact me for more details.

These statistics are based on information obtained from the TARMLS using Brokermetrics software on 1/5/10. Information is believed to be reliable, but not guaranteed. Months of Inventory (MOI) reflect the time period required to sell all the properties on the market given the number of closed transactions in the preceding month, provided no new product becomes available. This is an excellent benchmark to show the velocity of transactions in relation to the market inventories. This measurement is a broad one and will vary (in some cases dramatically) by price range, location and type of property.

**Median and Average Price (Closed Sales)**

- **Average Price**
- **Median Price**

Months of Inventory (MOI) is a good indicator of market health, taking into account both current inventory and sales rates. As a rule of thumb, a market is considered “balanced” when Months of Inventory is around 6. As you can see by this Long Realty Research Center map, market conditions can vary significantly by area. Contact me to get Months of Inventory information for your specific neighborhood.

These statistics are based on information obtained from the TARMLS using Brokermetrics software and from the GV/SAH MLS on 1/5/10. Information is believed to be reliable, but not guaranteed.
